Claim 7. (Currently cancel)

Claim 8. (Currently amended): A boat including a cover fastening system, the boat comprising:

 a body of the boat including first and second sides;

 a groove defined along the first side of the boat;

 a plurality of expanding anchors positionable within the groove; and

 a plurality of fastening members, each fastening member including a locking portion and a mounting portion, the locking portion of each fastening member being received within a respective anchor to expand and fix the anchor at a desired position along the groove, and the mounting portion being adapted to engage a corresponding mounting structure of a coat cover;

wherein the first side of the boat includes a freeboard extending in a generally vertical direction, a weatherboard extending in a generally horizontal direction, and a gunwale member extending along the first side of the boat, the gunwale

member defining a first receiving portion to accept one end of the freeboard and a second receiving portion to accept one end of the weatherboard, and wherein the gunwale member further defines the groove that receives the plurality of anchors.

Claim 9. (Original): The boat of claim 8, wherein the locking portion of each fastening member is a threaded portion.

Claim 10. (Original): The boat of claim 8, wherein the mounting portion of each fastening member is a snap portion.

Claim 11. (Currently cancel)

Claim 12. (Currently amended): The boat of claim ~~11~~ 8, wherein the gunwale member is an extrusion.

Claim 13. (Currently amended): The boat of claim ~~11~~ 8, wherein the gunwale member is made of aluminum.

Claim 14. (Currently amended): The boat of claim ~~11~~ 8, wherein the gunwale member further defines a channel configured to hold a bumper.

Claim 15. (Original): The boat of claim 8, wherein each fastening member and respective anchor is configured to slide along the groove and be located at a plurality of positions along the first side of the boat.

Claim 16. (Original): The boat of claim 8, wherein the groove extends along a substantial length of the first side of the boat.

Applicant: Paul David Zarn
Serial No. 10/718,139

Claim 17. (Original): The boat of claim 8, wherein the groove is downwardly angled.

Claim 18. (Currently amended): A boat including a side having gunwale extrusion, the boat comprising:

a weatherboard connected to the extrusion; and

a freeboard connected to the extrusion;

wherein the extrusion defines a groove that extends along a substantial length of the side of the boat;

an upwardly facing channel defined by the extrusion and configured to receive a first bumper; and

a laterally facing channel defined by the extrusion and configured to receive a second bumper.

Claim 19. (Currently cancel)

Claim 20. (Currently amended): The boat of claim ~~19~~ 18, further comprising a plurality of anchors and respective fastening members positioned within the groove.

Claim 21. (Currently amended): The boat of claim ~~20~~ 18, wherein the groove is downwardly angled for receiving anchors.
